*Quality comes First*

## MEDICAL STERILISATION

MedicaLine helps you comply with legal sterilisation requirements. METO autoclave labels double-check the sterilisation process. Our sterilisation labels are ISEGA certified.

A special indicator ink changes to a different colour, on completion of the sterilisation process to the EU standard.

Sample above: Steam Sterilisation Process. Also available for Ethylene Oxide and Gamma Radiation process.

## MEDICAL SERVICE

Dosage information to better serve your customers:

Price, dating and promotion labels to suit your needs:

## MEDICALINE

MedicaLine allows the printing and application of labels to medical and pharmaceutical products easily and in a highly professional way.

We develop labels that are seamlessly in line with your organisation, in any shape, size or colour and pre-printed with any information field, as well as your company's logo on request.

MedicaLine also helps you comply with legal sterilisation requirements. METO autoclave labels double-check the sterilisation process. Our sterilisation labels are ISEGA certified.
